Présentation

Activité détaillée

AQUITAINE DÉVELOPPEMENT INNOVATION is a regional agency dedicated to the economic territorial development to :

- Build up and coordinate key industry sectors, regional clusters, and companies associations for the implementation of a common development strategy through innovation
- Support the innovative companies' projects
- Carry out actions to improve business performance
- Contribute to the change of regional economic pools and support the companies in financial difficulties
- Increase the attractiveness of the territory

In the field of MRE, ADI launched at the end of 2014 a regional survey to specifically identify consultancy and industrial competencies in Aquitaine all along the traditional MRE value chain : engineering/design, components manufacturing, installation/construction, operation/maintenance.

More than 60 companies have since been referenced mainly in the following sectors : technical and environmental studies, MRE technologies' developpers, maritime works, harbour activities.
